**Note**

1. System Corrected: Image is geometrically corrected using Satellite Orbital Parameters (Image Header Information)
2. Map Corrected: Image is geometrically corrected using GCP (Ground Control Point) from JUPEM (series L7030 Topographic map of 1:50,000) and terrain correction using SRTM (Shuttle Radar Topography Mission) DEM (Digital Elevation Model) data of 90m spatial resolution.
3. Pansharp All Bands: System/Map Corrected Multispectral image (using all available Multispectral bands) combined with Panchromatic image.
4. Pansharp PNC: System/Map Corrected Multispectral image combined with Panchromatic image to produce PNC (Pseudo Natural Color) image.
