Seminar on remote sensing technology

KOTA KINABALU: A seminar was held here yesterday to create awareness about the latest remote sensing and related technologies, and their applications towards enhancing management efficiency.

Resource Development and Information Technology Minister Datuk Dr Yee Moh Chai, who officiated at the half-day event that was attended by 205 people, said it is an

opportunity for the participants to understand the remote sensing technology.

He said it can be used to improve management of agriculture, natural resources, environment, disaster relief, security and land development.

The seminar was conducted by two speakers from Remote Sensing Agency Malaysia, Azlikamil Napih and Nik Mazlina Nik Mustafa.
